

**Proceedings of the International Conference on
Nonlinear Analysis and Convex Analysis &
International Conference on Optimization:
Techniques and Applications**

Contents -II-

Preface i

Contents iii

Anthony To-Ming Lau (PDF, HTML)
*Some open problems on fixed point properties related to locally compact
groups and semigroups* 1

Hiroko Manaka (PDF, HTML)
*A note on Fixed point theorems of Leray-Schauder's alternative type for
an elastic nonlinear mapping in Banach spaces* 11

A. B. Muhammad, C. Tammer and A. B. Abubakar (PDF, HTML)
*A hybrid conjugate gradient algorithm with spectral parameters for
solving monotone operator equations with convex constraints and ap-
plication* 23

Bui Ngoc Muoi and Ngai-Ching Wong (PDF, HTML)
*Super asymptotically nonexpansive actions of semitopological semigroups
on Fréchet and locally convex spaces* 53

- Koichiro Naito (PDF, HTML)
Ihara zeta function and randomness of nonregular Ramanujan graph generated by p -adic chaotic systems 73
- Koichi Nakagawa (PDF, HTML)
Generalization of the convergence rate of Mann iteration in geodesic spaces with real curvature 91
- Shummin Nakayama and Yasushi Narushima (PDF, HTML)
Global convergence of a proximal memoryless symmetric rank one method for minimizing composite functions 99
- J. Nantadilok, A. H. Ansari and B. Nuntadilok (PDF, HTML)
Best proximity point results for generalized cyclic weak contractions in p -cyclic metric spaces 109
- Yasushi Narushima and Tatsuya Hirano (PDF, HTML)
Some robust supply chain network equilibrium models 133
- H. Nishio, S. Nakayama, Y. Narushima and H. Yabe (PDF, HTML)
A globally convergent active-set memoryless quasi-Newton method based on spectral-scaling Broyden family for bound constrained optimization 147
- Nutchari Niyamosot and Warunun Inthakon (PDF, HTML)
Strong convergence theorems for the split equilibrium problem and attractive point problems in Banach spaces 161
- Yu Ogasawara, Yuto Hisano and Masamichi Kon (PDF, HTML)
Comparing two clustering methods for interval-valued data 175

Jenjira Puiwong and Satit Saejung (PDF, HTML) <i>On the strict convexity of convex metric spaces in the sense of Takahashi</i>	191
R. Tyrrell Rockafellar (PDF, HTML) <i>Optimization and decentralization in the mathematics of economic equilibrium</i>	199
Kenzi Satô (PDF, HTML) <i>Incenters, circumcenters, and orthocenters of simplices of Euclidean spaces, spheres, and hyperbolic spaces: The interiority and their polarity</i>	213
Yoshiyuki Sekiguchi (PDF, HTML) <i>Homogenized KKT systems and strict feasibility of semidefinite programs</i>	229
Phikul Sridarat and Yeol Je Cho (PDF, HTML) <i>Generalized Caristi's fixed point theorems in metric type spaces endowed with graphs</i>	233
Wataru Takahashi (PDF, HTML) <i>Two projection methods for solving the split common fixed point problem in two Banach spaces and applications</i>	247
Habib ur Rehman, Wiyada Kumam and Jamilu Abubakar (PDF, HTML) <i>Two-step subgradient extragradient methods for a class of strongly pseudomonotone equilibrium problems in Hilbert spaces</i>	277

Atit Wiriyapongsanon, Yeol Je Cho and Narawadee Phudolsitthiphat
(PDF, HTML)

Fixed point theorems with τ_K -functions via R_K -functions in b -metric spaces 297

Kenjiro Yanagi (PDF, HTML)

Some kinds of uncertainty relations represented by tracial or non-tracial positive linear maps 311

Chaoli Yao, Christiane Tammer and Shengjie Li (PDF, HTML)

A fixed point approach with a new solution concept for set-valued optimization problems 323

Yeboon Yun, Shinya Yoshida and Min Yoon (PDF, HTML)

On selecting hyper-parameters in RBF network 353

X.-H. Zhang, S.-P. Xiao, L.-x. Xu, K. L. Teo and H.-Q. Xiao (PDF, HTML)

Improved stability criteria for systems with time-varying delay via a novel integral inequality 369
