|---|----|
| Preface | i |
| Koji Aoyama, Yasunori Kimura, Wataru Takahashi and Masashi Toyoda <i>Strongly nonexpansive sequences and their applications in Banach spaces</i> | 1 |
| Sachiko Atsushiba <i>Strong convergence theorems for a family of relatively nonexpansive mappings in Banach spaces</i> | 19 |
| T. Domínguez Benavides and S. Phothi <i>Porosity of the fixed point property under renorming</i> | 33 |
| Mark Elin, Simeon Reich, David Shoikhet and Fiana Yacobzon <i>Rates of convergence of one-parameter semigroups with boundary Denjoy–Wolff fixed points</i> | 43 |
| B. Gavira <i>Some partial answers to the problem of extending Kirk’s Theorem for multivalued nonexpansive mappings</i> | 59 |
| Kazimierz Goebel and M.A. Japón Pineda <i>On a type of generalized nonexpansiveness</i> | 71 |
| Takanori Ibaraki and Wataru Takahashi <i>Generalized nonexpansive retracts and convergence theorem for generalized resolvents in a Banach space</i> | 83 |
| W. A. Kirk <i>Universal nonexpansive maps</i> | 95 |

| | |
|--|-----|
| Gang Li and Brailey Sims <i>τ-Demicloseness principle and asymptotic behavior for semigroups of nonexpansive mappings in metric spaces</i> | 103 |
| Shin-ya Matsushita and Wataru Takahashi <i>The sequences by the hybrid method and the existence of fixed points of nonexpansive mappings in a Hilbert space</i> | 109 |
| Eva M. Mazcuñán-Navarro <i>A direct proof of the fixed point property for nonexpansive mappings in uniformly nonsquare Banach spaces</i> | 115 |
| Sehie Park <i>Generalizations of the Himmelberg fixed point theorem</i> | 123 |
| M.A. Japón Pineda <i>A remark on the generalized Banach contraction principle</i> | 133 |
| Anna Betiuk-Pilarska and Stanisław Prus <i>Banach lattices and the fixed point property for direct sums</i> | 139 |
| Tomonari Suzuki and Misako Kikkawa <i>Some remarks on a recent generalization of the Banach contraction principle</i> | 151 |
| Hiroshi Takahashi and Wataru Takahashi <i>Existence theorems and strong convergence theorems by a hybrid method for equilibrium problems in Banach spaces</i> | 163 |
| Wataru Takahashi <i>Iterative methods for approximating common fixed points of countable families of nonexpansive mappings</i> | 175 |
| Wataru Takahashi and Kei Zembayashi <i>A strong convergence theorem for the equilibrium problem with a bifunction defined on the dual space of a Banach space</i> | 197 |

| | |
|--|-----|
| David Yost | |
| <i>Uniformly non-hexagonal Banach spaces</i> | 185 |
| List of participants | 219 |
