

Call For Papers

The managing editors of the journal "Linear and Nonlinear Analysis" (Yokohama Publishers, Japan, <http://www.ybook.co.jp/lna.html>) are going to publish a special issue dedicated to

Professor Makoto Tsukada (Toho University, Japan)

on the occasion of his 65th birthday.

Professor Tsukada is a distinguished mathematician for his research on Functional Analysis. In particular, in the aspect of Nonlinear Analysis, he is known for 'Tsukada's theorem', which describes the relation between the convergence of sets and corresponding projections for them.

We are pleased to invite all the researchers who are involved in this field to contribute a paper to this special issue. We hope you could accept our invitation.

Please send your manuscript to the email address lna@ybook.co.jp

When submitting your manuscript, please indicate that your submission is for the special issue dedicated to Professor Makoto Tsukada on the occasion of his 65th birthday.

After the refereeing process of your submitted manuscript is finished, we will send you the review result by email.

The topics of this special issue are as follows:

- Functional Analysis,
 - Nonlinear Analysis,
 - Set-Valued Analysis,
 - Fixed Point Theory,
 - Operator Theory,
 - Banach Space Theory,
 - Measure and Integration,
- and related areas.

There are page charges for the accepted manuscripts to this special issue. However, if you do not have any financial support for your research, you do not need to pay the charge.

If you need more time for preparing your manuscript or you have any question on this special issue, please contact us by email.
